

Boost Your DMLM Productivity with Magics Metal package for Colibrium Additive

Streamline your DMLM Workflow

Enhance your Metal 3D printing workflow and bring ideas to market faster with Materialise Magics packages built specifically for Colibrium Additive DMLM printers.

- **Reduce data and build preparation time** and print parts with **industry-leading accuracy** using **Magics RP**
- **Optimize metal support structures and prevent costly print failures** with **SG+**
- **Easily send jobs directly to 3D printers** through the **Colibrium Additive Build Processor (BP)** by customizing BP parameters that enhance print speed, quality, and consistency

Get started with the Magics Metal Package for Colibrium Additive

Magics RP + SG+ + Build Processor

*Fixed annual subscription license, assigned to one computer. Valid for Concept Laser Mlab R and Mlab 200R.

Why Materialise Magics?

To help you realize your projects, scale up your production, and establish an efficient 3D printing business, Materialise leverages its nearly three decades of 3D printing experience in the development of premium Additive Manufacturing (AM) software solutions.

The Materialise Magics 3D Print Suite includes design optimization, industry-leading data and build preparation software, quality inspection tools and production management systems, **offering an end-to-end software suite for AM production factories.**

Rely on our team of industry experts

Objective3D, Australia's leader in 3D printing and scanning technologies, delivers advanced additive manufacturing solutions across industries.

In partnership with Colibrium Additive, they specialize in metal additive manufacturing using Direct Metal Laser Melting (DMLM) and Electron Beam Melting (EBM) technologies.

As a reseller of Materialise AM software, Objective3D integrates top-tier software with its 3D printing technologies, streamlining production processes and enabling clients to achieve cost-effective, high-precision results from design to final product.
